**Enhanced Productivity for 2008!**  
Ask us how -  
ITEX booth # 248

**What does this mean for you?**

NextStar automatically detects the individual frames, while enabling you to view them all at once. No more rescans, reloads or lost images. View, audit and QA all images at once. Define image enhancement features from a wide variety of options as NextStar instantly detects varying image size and density.

**The results?**

No longer do you have to view and correct one image at a time. Minimal training is required. One operator can handle multiple scanners. NextStar won't slow down for even the largest images, and you can be sure to achieve the best image possible for digitization.

**NextStar Redefines How Microfilm and Microfiche Scanning is Done**

Easily, Quickly, Accurately, Economically
